

Wireless Motion Sensor Alarm

Product Code: **BDEIS1**
Barcode: 6002844046606

- Adjustable infrared motion sensor
- No wiring needed
- Wireless up to 80m
- Alarm and 36 tunes
- ICASA Approved
- Easy to Install
- 3 volume settings (Low, Medium and High)

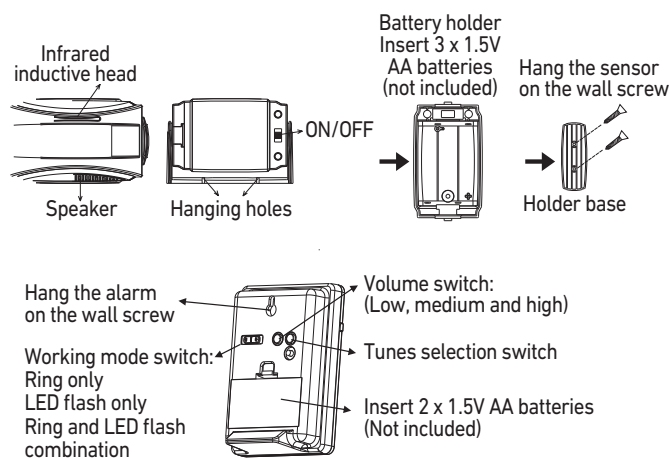

Wireless Motion Sensor Alarm

The Ellies Wireless Security Alarm is ideal for entrances of stores, garages, balconies and storerooms. It has an infrared motion sensor that detects movement up to 8m.

Installation diagram

Installation and usage

Avoid positioning the infrared sensor in direct sunlight or in a place where it faces a window, a heater or air-conditioning unit as this may trigger the alarm. Install the infrared sensor on a wall facing the area you need to monitor at a height of between 1m and 1.5m. The angle of the sensor can be adjusted for best area coverage. The alarm unit can be adjusted to sound the alarm or play a tune at 3 different volume levels.

TECHNICAL INFORMATION

Specifications:

Transmitter frequency:	433.92MHz
